

# BLUINK LTD.

eID-Me: Instant identity verification, digital ID / wallet, password-free login

## 概要 OVERVIEW

**eID-Me** is a smartphone app that *verifies the identity* of your customers and provides a *digital identity* that can be used to log in to websites *password-free* and *prove* specific pieces of *identity* information online and in-person. eID-Me enables all services that require ID information, including government, financial, healthcare, and more. Increase customer acquisition and reduce fraud with eID-Me today.

## 特徴 FEATURES / BENEFITS

- **eKYC / ID Verification:** Automatically verify name, age, address, and more in minutes with ID scanning, authentication, live selfie, and geolocation. Customers can verify their ID directly in your onboarding or they can verify their ID to get their reusable digital ID on their smartphone (see below).
- **Verified Digital ID Platform / Digital Wallet:** Verified ID information is encrypted offline in a secure and reusable digital wallet on each user's smartphone. This pre-verified information can be requested by your organization for instant ID verification.
- **Password-Free Login (MFA):** Enable fast, easy access to services with reusable, verified ID info and secure multi-factor authentication. No forms or passwords.

## 今後の展開 FUTURE PLAN

- Bluink plans to expand eID-Me to the remaining Canadian provinces, support more ID documents, add integrations with organizations, and develop commercial partnerships with Japanese organizations.

## 対コロナへの関連 RELEVANCE TO COVID-19

- As the whole world shifts to remote work, private and secure access to services is essential. Integrating eID-Me allows customers to easily access your online services with password-free login. With eID-Me, you can verify their identity and request information needed for your services. Improve access and reduce fraud with better security and convenience for your customers.
